

# GUN SAFETY

**Does your child know  
what to do if he or she finds a gun?**

**STOP** — The first step is crucial. Stopping gives your child the time he or she needs to remember all of the safety instructions.

**DON'T TOUCH** — A firearm that is untouched is unlikely to be fired and otherwise capable of endangering your child or other people.

**RUN AWAY** — This removes the temptation to touch a firearm, as well as the danger of another person negligently causing it to fire.

**TELL A GROWN-UP** — Children should seek a trustworthy adult, neighbor, relative or teacher - if a parent or guardian is unavailable.
